EXPERIENCE

2021 - Now

Front End Web Developer

Bit Hub Technology / India, Pune

- As a Front End Web Developer at Bit Hub Technology, Pune, I designed and developed user-friendly websites using HTML, CSS, Bootstrap, and React.js. I collaborated with design and development teams to ensure seamless integration of front-end elements, implemented SEO and accessibility best practices, conducted regular website maintenance and updates, and resolved technical issues promptly.

PROJECT

Project Title: Southern Hospitality Management

Description: The 'Southern Hospitality Management' aims at providing to manage their customer services and internal management system. This application used to simplify their hotel operations and accommodation like room reservation, room allocation and administrative task. The main purpose of this application is to provide centralized user-friendly platform that empower the hotel to streamline their operation and enhance guest experience and optimize efficiency of their staff.

Environment: React, Redux, HTML, CSS(Sass), Figma, Jira, Git, NodeJS, Express.js, MongoDB, Azure Cloud Services, TDD, Jest, Gulp, Grunt, Spring MVC, Micro Services.

- Responsibilities: As a front-end developer, I translate mockups and wireframes into responsive web pages using React for single-page applications. I collaborate with the backend team to integrate front-end components seamlessly with Node.js and Express.js in the MERN stack. I implement Redux for state management and facilitate data flow between components. Additionally, I handle API integration, optimizing the user experience by improving page load times, performance, and implementing smooth transitions and animations. I contribute to writing unit and integration tests, participate in code reviews, and document front-end code for maintainability. Continuously learning and staying updated with the latest front-end development trends and technologies is a priority.
